POULTRY PRODUCTION CLASSES

The Directors of the Agricultural Society are to be congratulated on their thoughtfulness in giving the prominence they have to the value of production in poultry, as is evidenced by the valuable prizes they offer and the classification they have used. It is often a question of dispute as to which of the breeds is the most profitable. The directors have given each of the utility breeds an opportunity of competing among themselves and in addition the special prizes of the Bank of Hamilton for the best in the class will be an incentive for the fanciers of a special breed to bring out the best they have in an endeavor to obtain the coveted prize. The mode of judging may be best explained by giving a copy of a letter from Mr. Jos. Shackleton, of Edmonton, who will act as judge, and who, from his position as Superintendent of the poultry plant of the Department of Agriculture there, is qualified to speak with authority:

"With reference to my mode of judging production classes, I may say that I am a great advocate of standard type and color combined with high production and in judging these classes, my decision will be based on body conformation, condition and standard type.

"Any cross breeds or birds that are far from standard type and color will not be given much consideration.

"I am satisfied that it is possible to have birds that score high according to the American standard and at the same time lay considerably over two hundred eggs per year. These are the birds we want everybody to breed for and we believe in this way we will build up one of the greatest industries in the country."

From the foregoing, it will be seen that Mr. Shackleton's idea is to combine production and type a standard that all good farmers are striving for. We would suggest that those desirous of improving their flocks will make as many entries (3 birds) as they can and thus get Mr. Shackleton's opinion on their proposed breeding pen for next year. As there is no entry fee to members of the Agricultural Society, full advantage should be taken of his judgment.

The poultry department is under the direction of the Poultry Association, any further information will be gladly given by the secretary.

FINE LODGE AT VULCAN.

The Sentinel, the official organ of the Orange Association of British America, published at Toronto, under the caption "Fine Lodge Instituted at Vulcan," makes the following reference to the local Orange Lodge:

"The Rose of Derry L.O.L. No. 2794" was instituted in the town of Vulcan, Alberta, on August 17, by R. W. Bro. Robert White, Grand Organizer. Rev. W. B. Mahon is W. Master; Capt. J. Naismith, Dep. Master; Rev. A. E. Hayes, Chaplain. Dr. G. M. Carson is one of the most active workers and a whirlwind. Almost all the members are business men, and it is anticipated that the lodge will have 40 or 50 members before the end of the year.

The fee for admission, to include the three degrees, is \$25; the annual dues are \$6, and the affiliation fee is \$5. From the way they are starting off it looks as if this will be one of the best lodges in the West. Their slogan is: "The best is none too good and nothing cheap around Vulcan."

The brethren from High River motored over, some 60 miles, to assist the Grand Organizer, Bro. White, with the work, and, as the genial W. Master, Bro. Harry Nelson said: "To show our Bob that we are going to stand loyally behind him in his work."

THE SCHOOL FAIR

This year the School Fair will be held the same day as the Agricultural Fair, namely, September 22nd. Prize lists have already been mailed to the teachers of the various schools in the Vulcan district and by the end of this week the pupils ought to have some exhibits ready. This is the first fair of its kind held in the district and although the time is short to make preparation, all schools have an equal start.

In order to make it easier for the pupils to make entry, the time has been extended for sending in. The Committee has arranged to accept exhibits up to 11 a.m. of the day of the

Fair.

In order to extend the time, the Committee decided to accept exhibits up to 11 a.m. of the day of the Fair. This ought to enable the children to bring the exhibits in when coming to the Agricultural Fair.

The prize lists is long and varied and is such that no pupil need be deterred from making some entry. The list ranges from simple things, such as a bouquet of wild flowers, to a more difficult task of making a bird house or baking bread. Under the head of Grain, prizes are given for various sheaves. Any boy or girl that can collect a sheaf of wheat four inches in diameter should attempt to make entry. But the prize list, which by now ought to be in the hands of all teachers in the Vulcan district, explains what is required for the School Fair. The teachers are asked to take up the work enthusiastically with the children and attempt to get as many exhibits as possible. A little success this year assures better results for next.

For further particulars write Rev. A. E. Hayes, Vulcan, or take up with any of the Committee.

HIPWELL-McMAHON

A quiet wedding took place on Tuesday last at the home of Mr. and Mrs. H. G. Hanson, when Miss M. Claire McMahon, daughter of Mr. and Mrs. J. H. McMahon, of Delhi, Ont., became the bride of Mr. Clarence H. Hipwell, of Lang, Saskatchewan, the ceremony being performed by the Rev. Father McLaughlin. A dainty lunch was served after which the young couple left on the evening train for Banff and other western points, where they will spend their honeymoon before taking up their residence in Lang, Saskatchewan.

POLICE COURT ITEM.

An assault case was heard at the police court when Henry Keiser, of Brant, was charged with assaulting W. Spence, a harvest hand. It appears that Spence went to the farm where Keiser was working to get his pay cheque when for no apparent reason he was struck on the ear by the accused who was then joined by two other men named McPhail and Eversman, who assisted in beating up Spence. The accused pleaded guilty to the charge and was fined \$5.00 and costs. D. N. McPhail and Eversman were also fined \$5.00 and costs for assisting Keiser in the assault.

DEATH OF MRS. McNARY.

The Advocate regrets to announce the death of Mrs. McNary, of Ensign, on Thursday evening last. The deceased lady, who was sixty-three years of age, had been ailing for some time, and although everything that medical skill could do was done, she passed away on the above date. Mrs. McNary was highly respected in the community, as was evidenced by the large number of friends who attended the funeral to pay their last respects. Burial took place on Saturday, September 4th in the Vulcan cemetery, the services being conducted by the Rev. W. B. Mahon of Ensign. The deceased lady leaves to mourn her loss, three sons, Seth, William and Edward McNary.

FALL FROM SEPARATOR CAUSES DEATH OF UNKNOWN MAN.

While engaged at work with the threshing outfit of W. J. McIntyre this morning, one of the crew fell from the top of the separator and broke his neck. He was seen falling by other members of the crew, but he fell on the opposite side to where they were, and nobody seems to know the cause of the accident. The deceased man only came down from Calgary last night and started work this morning, and nothing is known about him—not even his name. The only clue found is a prescription for medicine, made out by Dr. Rae, of Lethbridge in the name of A. Dobie, but whether this is the name of the unfortunate man has not yet been ascertained. The deceased was about thirty-seven years of age, and from what can be gathered from other members of the crew he appeared to be a French-Canadian. The police are working on the case with a view of identifying the body.

Mr. Liggett, school inspector for this district, spent several days in Vulcan last week, on official business.

VULCAN LOCALS.

Have you tried the new wet-proof nitro-club shells at McPherson Bros. yet?

This is a busy season for the farmer, but do not overlook the Agricultural Fair to be held September 22, and prepare your exhibits. Generous prizes are being offered in all classes of exhibits, so do your bit and help boost the old home town and district.

A Special meeting of the Samaritan Lodge T.O.O.F. will be held in the Hall on Wednesday evening, September 15, at 8.30 o'clock. All members and visitors please take notice.

Mr. and Mrs. Naismith returned from Calgary on Tuesday, where they spent the week-end visiting relatives.

Mr. D. MacDonald, of High River, passed through Vulcan on Tuesday on his way to Lomond to visit with an old friend, Mr. Armstrong, who he has not seen for about forty years.

Extra Specials at McPherson Bros. in Endless Belts. Order early.

Mr. Will Elias has been transferred from the Medicine Hat store of McPherson Bros., to assist in their Vulcan store during the busy season.

Mr. and Mrs. Schaddle, who have been visiting at the home of their sons, Albert and Fred Markert, left for Banff on Tuesday, where they will stay for a few weeks before leaving for their home in Illinois. They were well pleased with the country and hope to be able to return again in the near future.

Labor Day passed off very quietly in Vulcan, there being nothing special to distinguish it from the ordinary day without a name. Most of the stores were closed the better part of the day, which, no doubt, was very inconvenient for the large number of farmers who came to town for the purpose of shopping.

Although late in being organized for effective work, the committee of the School Fair held a meeting on Friday evening in the office of Hagerman & Co. and discussed different matters in connection with the fair, which is to be held on the same date as the Agricultural Fair. Owing to the time being so short, it was decided to send the prize lists out to the different schools in the district and ask for their immediate co-operation, and also letters to the secretaries of these institutions asking for financial assistance.

The parcel of bullion with which a joke was played on one of the bank clerks a few days ago, was left on the steps of the bank all Saturday afternoon and evening, and on Sunday morning it had disappeared. The person who lifted it apparently thought that he had got a prize and carried it to a back lane some distance away, where it was opened. We can imagine his surprise and the language he would use on finding what the contents were.

The engagement is announced, of Lillian Constance Clarke to Charles Hyndman McMillan, manager of the Bank of Commerce at Vilna, Alta., son of Mr. and Mrs. J. P. McMillan, of Strome, Alta., the marriage to take place on Wednesday evening, September 22nd, at the home of the bride-elect. Mr. McMillan is well known in Vulcan, having been on the staff of the Bank of Commerce at this point for several months.

With the splendid weather that has prevailed without a break for the past few weeks harvesting is practically over in this district, and threshing is now in full swing. Quite a little wheat has been delivered to the elevator and has graded No. 1 Northern. The yield, as far as we can learn, will be from 18 to 25 bushels to the acre for wheat.

Mr. Kehr, of the Vulcan Tire Station, has hit upon a novel scheme to attract people to his store. He is exhibiting in his window a metal sheet stand upon which is announced the daily prices of grain. This is of especial interest to farmers at this time of the year, and a large number take advantage of this information daily. Mr. Kehr also keeps himself posted on other matters of importance to the farmers and those who are interested in either the price of grain or tires would do well to call on him.

VULCAN LOCALS.

Mrs. A. E. Hayes will receive on Tuesday afternoon and evening, September 14th, and afterwards on the first Tuesday of each month.

See the new Enterprise Cook Stoves at McPherson Bros. Prices cooked to the bone.

Mr. Joe Taylor, of the High River Times staff spent a few days in Vulcan last week, assisting in the work on this great family journal.

Miss Irene Molloy, of Nanton, but now of Brant, was a Vulcan visitor over the week-end.

Mary's little lamb may stray, in pastures old to roam, but Mary knows it knows the way to come back to its home.

Mrs. Charles Fitzpatrick returned to her home in Vulcan on Thursday, after visiting for several weeks with relatives and friends in Calgary.

At last the genuine English Crockery has arrived. Full assortment, of Cups, Plates, Bowls, Pitchers, Platters etc. at McPherson Bros.

The Rev. A. E. Hayes attended the Presbytery held at High River on Wednesday last.

The Boy Scouts will parade at the usual time and place on Thursday evening next.

Mr. and Mrs. D. C. Jones left on Wednesday last for Vancouver and other coast cities, where they will spend their vacation.

Oddfellows! Keep Wednesday evening, September 15 open and attend the special meeting in the hall.

Rev. and Mrs. Hayes motored to High River on Tuesday last.

Mrs. Chapple, of Vancouver, is spending a few weeks in the district, visiting with friends in town and at Reid Hill.

Choir practice for the Adult Choir of the Vulcan Church will be held on Friday evening next at 8.30.

Mr. and Mrs. Roy Walker motored to Calgary on Saturday, where they spent the week-end.

Mrs. J. P. Rogers and son, who have been staying in town for the past few weeks, left on Monday for their home in Wellsville, Mo.

Don't forget the special meeting of the Oddfellows in the hall on Wednesday evening, September 15th. All members and visitors are requested to attend.

Three guesses for the young man who went duck shooting on Monday last, fell in a slough and had to return a wetter but a wiser man with one duck as a consolation prize.

Mr. and Mrs. C. E. Wilson and sister and Mr. J. G. Wilson motored to Vulcan from Parkland on Sunday, and spent the day with Mr. and Mrs. N. B. Wilson.

Mr. and Mrs. W. R. Walling of Seattle were Vulcan visitors for a few days last week.

Mr. and Mrs. R. D. Wagner, who have been spending the past few days in Vulcan, the guests of Mr. and Mrs. A. G. Nieman, returned to their home in Calgary on Saturday last, accompanied by Mrs. Nieman.

Mr. Thomas Logan and Miss E. M. McKenna, of Calgary, were visitors in Vulcan over the week-end, the guests of Mr. and Mrs. Jack Thompson.

Don't forget the dance in the I.O.O.F. Hall on Friday evening next, September 10th. Special orchestra.

Some very good pictures were again shown at the Opera House last week, and they were greatly enjoyed and appreciated by the large crowds that attended. Saturday evening a special picture—"For Better, For Worse," was shown which was exceptionally good, also a two-reel comedy, Fatty Arbuckle, in "Love." The management have also engaged a four piece orchestra for the winter season, which should prove an added attraction and make the picture show more popular than ever.

A REFRESHING CONTRAST.

In June of last year a man who signed himself "F. S. T." wrote to the London Times stating that he proposed to give twenty per cent. of his estate, which had a value of about \$585,000, to the government to be applied in the reduction of the country's debt. The phrase "richesse oblige" was adopted as the motto of a considerable movement along these lines, inspired by the patriotic example of "F. S. T." In January last "A. M." wrote, saying that he proposed to hand over for cancellation \$120,000. of the Funding Loan. He explained that he would have to realize existing investments and borrow from his bankers before completing the transaction. In May the chancellor of the exchequer announced that the transaction had been completed and that the sum had been raised to \$130,000. Early in August he announced further gifts, one of \$12,000 and another of \$5,000, and expressed the government's grateful appreciation. These facts should be widely recorded. They supply a very refreshing contrast to practices that we have become accustomed to, founded on the theory that the public treasury is fair game for anyone.

"WHO KILLED COCK ROBIN?"

In this case it was a farmer. The cheery tree in his garden was all the proof he wanted that that "confounded robin" was his enemy. "Why I saw him stealin' cherries," he said, "and I caught him in my strawberry bed, too, and I'll shoot every one of them thievin' fellers I get a chance at." Well, we didn't have any of the poor dead things he had killed or we should have shown him the contents of their stomachs. Had he seen the grubs and bugs, the cutworms, the caterpillars, the grasshoppers, and the score and more of other foes of his garden and orchard and farm that these poor dead robins he had shot had been destroying, how small would have seemed the board bill they owed him for the few cherries and berries they had eaten. Indeed, the bit of fruit they had taken was just an occasional dessert after their abundant meal of bugs and grubs. The birds he shot are dead. The farmer lives, we hope a wiser if sadder man. Dumb Animals.

BRITAIN'S RECUPERATIVE POWERS.

Great Britain has wonderful recuperative powers. She has already paid in the form of taxes and war contributions about twenty billion dollars, or 36 per cent. of her total war expenses. The mind can scarcely grasp the war cost to the British government. In six years fifty-six billion dollars were expended. Some idea of what this outpouring of treasure means may be gathered from the fact that it amounted to more than the total cost of running the government during the previous 225 years, including the financing of eight big wars and many little ones. Although her debt has soared tremendously in recent years, Great Britain is no worse off to-day than she was at the close of the Napoleonic period.—Calgary Herald.

20,000 MILLIONAIRES

It will bring joy to the hearts of all the radicals in Calgary to learn that according to the government income tax reports there are now 20,000 men in the United States who luxuriate in an annual revenue of \$50,000. Most of these persons are millionaires, many of them having risen to this glad eminence by profiteering operations during the war. By way of contrast, it should be stated that half of the 4,000,000 citizens who have rendered statements to Uncle Sam have incomes of \$2,000 per annum. So 20,000 Americans are rich beyond the dreams of avarice, 2,000,000 are trying to scratch along in the \$2,000 class, and about 96,000,000 are a still more modest recompense.

Montana is credited with having the best school system in the United States.

HIGH COST OF POLITICS.

Election poll officials in the United States threaten to go on strike if their demands for an increase of \$5 per day are not met. Opposition is given the movement and it is not likely the increase will be granted.

ENTITLED TO THE HONOR.

Col. James Walker, of Calgary, has been selected as comptroller of the R.N.W.M.P., at a meeting of old veterans, held at Vancouver recently. Col. Walker came to Canada in 1873 with Col. French, when the force was established, and he took part in the famous march across the untracked prairie to Fort McLeod, where not a man in the troop had been before.

IN THIS WE ALL AGREE.

R. B. Bennett, K.C., who attended the Canadian Bar Association at Ottawa, was one of the speakers, and as usual he gave those in attendance something to talk about. He took a very advanced ground as regards the judiciary. He thought Canada could not have a great judiciary so long as the appointments thereto were the reward very often of political service. Moreover, judges should not be appointed after the age of 60, but younger, so they could get the judicial habits. We would almost advocate that men who, made public life and service their vocation should be debarred from judicial positions, and these given to the most eminent practicing lawyers, who were in touch with the law. Others agreed with this view.

ARE NEVER SATISFIED.

And now comes the report that the Canadian Express companies are demanding a 40 per cent. increase in their rates. It will require juggling of figures on the part of the Express Companies to show the public that they are entitled to an increase of 40 per cent. Judging from the huge revenue they obtain from liquor alone, we should imagine they would be satisfied with returns.

There are supposed to be 100,000 Canadian veterans of the Great War living in the United States, and they plan a national organization of British and Canadian Veterans of America. One purpose of the organization is to secure for these veterans the same bonus or pension rights that are accorded their fellows in the British Empire.

DON'T ROCK THE BOAT.

From Foster's weather forecast in the last issue of the Calgary Herald we clip the following:

Farmers, mine operators, manufacturers, local dealers connected with them, and the labor elements should steady their nerves at this time. Don't shove any one off their feet, don't lie down. We are all in one boat and whoever rocks the boat should be thrown overboard. The federal reserve bank rocked the boat and deserved a deep ducking, but they are doing better now. A depression is on, but a great disaster will not come this time. Thanks to our lawmakers, we now have the best financial and banking system ever operated in America, and, if the reserve board behaves itself, we will pull through this necessary depression without any great calamity. Producers have nothing to fear for 1921 and should take hold with confidence in the future. The new American-Canadian race is one people and are the descendants of the very best elements of the best races on earth. This new race and this continent of North America have the only really good prospects in the world. Great prosperity is only a little ahead of us. Keep your nerves quiet and look with confidence on the future.

DOES NOT APPLY TO YOU.

We do not know the origin of the following, but possibly Bob Edwards does, at any rate it appears to us to be fairly accurate and not far from the truth:—

The world did not come to an end last December, as was predicted by some fellow who didn't know what he was talking about. We are glad he didn't and we hope it will not come too soon. But if the worst is to happen there are a lot of subscribers who ought to settle up as we don't want to chase all over hell to find them.

A harvester from Montreal writes to the Eastern papers that hundreds of harvesters who came out west to help in the grain fields cannot find work. Rather strange this, in view of the great difficulty in securing hands to work in this district.

OF INTEREST TO ALL.

Canada's paper and pulp exports increased from \$8,639,984 in 1911 to \$104,636,901 in 1920.

The problem confronting the Poles is in the feeding of the hungry Bolshevik prisoners.

A Kentucky judge ruled that no limit can be put upon a physician as to the number of liquor prescriptions he can issue.

Alabama, Texas and Virginia furnish more than one-half of the peanuts; Wisconsin and Illinois 41 per cent. of the clover seed.

An Australian rancher has found that he can kill rabbits on a wholesale scale by piping the exhaust gases from his automobile into their burrows.

Bodies of 2,891 U. S. soldier dead have been returned from overseas. Requests have been made for return of 45,000 bodies.

In France there are 14,000,000 who have savings accounts. These accounts amounted in 1913 to 5,818,000,000 francs. This has increased largely during the war.

Civil war in Russia would cease immediately if the Russian people were free to organize a government according to their own wishes, says General Wrangel, anti-Bolshevik leader.

It looks as if the Mayor of Cork will starve to death in an English prison, and if he does there is no one to blame but himself. His fate is in his own hands and if he wants to starve with plenty food on his table, all very well and good. It looks like foolish suicide not to eat.

A fund has been started for the benefit of dependents of the late Corporal Usher and Constable Bailey, who lost their lives in their efforts to restore law and order by the arrest of desperadoes at Bellevue, a couple of weeks ago. The fund should be supported by all who can afford the same. Send contributions to Union Bank at Bellevue.

Fifteen cent sugar in the near future is expected in Toronto. Several sugar speculators who had bought large stocks in the hope of cornering the market are now anxious to unload at greatly reduced prices.

A peculiar accident happened at Owen Sound when a high voltage wire of the hydro system fell across a telephone cable, burning it completely through and putting 200 private telephones out of commission.

Five thousand, five hundred harvesters from the east came to Alberta to help in the harvest fields and all have been placed in positions on farms.

The Cameron ranch, owned and operated by the Noble Foundation Co., Ltd., will market over 250,000 bushels of wheat this year. The grain will be put in elevator at Chin.

John Doughty, former secretary to Ambrose Small, the Toronto millionaire, who disappeared mysteriously after Mr. Small, has been arrested in France.

The man who is able to buy any sort of printing is able to buy good printing. If he uses anything else it indicates to people who see it that he doesn't care especially about the matter. And most people would infer his general character and personality to be in keeping—so it's a disastrous policy not to care about printing.

The Normal Schools of the province opened on Tuesday with a very fair attendance, all of which is due to the policy of the educational department at Edmonton in advancing loans for Normal School expenditure.

A road map of the sky has been issued by the Canada Air Board. Within ten years the air route will be the popular route for travelling.

One does not read these days in the press about enormous salaries being paid baseball pitchers and opera singers as in the past, and for this we may thank the income tax. Recently one press agent in New York was so ill advised as to state that a certain reigning favorite was securing \$25,000 for a ten weeks engagement in addition to her regular salary. This brought the tax collector around with a demand for \$7,540, in addition to what the lady was already assessed for. The explanation was then given that the \$25,000 was only a deposit as a guarantee of salary payment, which is a rather different thing.

The Pathephone

Music through a
Sapphire
Ball.

No Needles
to
Change.

THE Sapphire Ball holds the secret of the Pathephone's perfect tone—Like a drop of water it runs freely, smoothly, without scratching or cutting.

The Pathephone plays all makes of records—has all the advantages of other gramophones—yet costs no more than ordinary phonographs.

Pathephones are built in period model designs—exquisite pieces of furniture to fittingly match up with your most elaborate furnishings.

The exterior beauty of the Pathephone is but an outward indication of its perfect interior construction. You'll be proud to possess one in your home.

BRANT NEWS.

There are several large farming organizations in our locality and they are now engaged in the closing scenes of cutting the golden grain. Look out for large yields and good quality when threshing begins.

Charles Horsefield will be badly missed in Brant, in musical as well as social circles. He left last week for the north to take charge of one of the Terwilliger grain elevators.

Miss Irene Malloy, of Nanton, is in charge of the junior grades of our school, this year.

John Eversman is another big farmer who has proven his merit on the field of action and when it came to harvesting his crop of over 1,700 acres he was there with the goods. The crops hereabouts are very good and in this connection we may say it is a tribute to the careful methods adopted by our farmers in preparing their soil, that they are cutting such a splendid crop.

You have got to hand the palm to "Dad" Fletcher when it comes to tackling a big proposition. This year he had 2,250 acres under crop and mostly wheat. The grain ripened within 90 days of seeding time and with such a large acreage it is sometimes difficult to cope with the quickly ripening grain, but Mr. Fletcher was equal to the occasion and had seven binders attached to his tractor and it was a most unusual sight to witness the operation of the engine and seven binders. "Dad" Fletcher is a progressive farmer and a mighty good citizen and we are glad to realize that he will garner a very profitable crop this year.

The farmers of Brant district acknowledge the splendid service rendered them by Messrs. Johns and McKay in their general store. With large outfits operating in the district, and where large orders are necessary to outfit and feed the men required in harvesting and threshing operations, the management of the Brant store is always found prepared for any emergency. Messrs. Johns & McKay carry a large and well assorted stock and their business is extensive over the entire district.

IN A LIGHTER VEIN

Over a glass of grape juice the comedian was telling of his hard lot to a friend. "It's not a bit good," he finished. "I shall leave the stage."

His friend, in his inmost thoughts, agreed with him, but for the sake of politeness expostulated. "Oh, don't do that!" he cried. "If you leave the stage you will be missed."

"It's about time, too!" snapped the actor angrily. "I'm pretty tired of being hit!"

"Do you want the shoulders padded?" asked the tailor of the mother who was buying a suit for her boy.

"No, mamma," pleaded her son, "tell him to pad the knickerbockers."

"Bessie," said her mother, "why is it that you and your small brother are always quarreling?" "I don't know," replied the child, "unless I take after you and he takes after papa."

Luke McLuke says the old fashioned woman who used to wear clothes to impress the men, now has a daughter who goes without them to impress the men.

A NATURAL PLEA.

The price of anthracite coal in Winnipeg will advance \$1.10 a ton, effective September 1st, bringing the price up to \$22.60 a ton.

The Strathcona farm, at Calvine, Man., was sold recently for \$150,000. The farm consists of 2,500 acres and sold with crop at \$60 per acre.

The aviators that flew from New York to Nome by way of Edmonton are on their way back, after doing what was considered the impossible.

A boy aged six years at Windsor ate ice cream and green grapes and in three days he died from septic poisoning as a result.

VISITING ROUND T.

The "Columbia" a private car from Rochester, New York, is now resting on the tracks, in High River. Travelling therein are Mr. Hiram Sibley and party, Messrs. T. W. Fennucaus, W. W. Webb, J. W. Taylor and H. C. Beckwith, and they are now guests at the Round T ranch with Mr. and Miss Bennis. Mr. Sibley comes here every year to look after his farming and ranching interests and this year he is eminently pleased with crop conditions as compared with 1918 and 1919. They were interested, spectators in the cutting of the sunflower crop on the Round T ranch.

400 MILE TRIP.

Dr. Bedingfield returned Tuesday morning after a trip extending over 400 miles from High River to the town district. He was accompanied by Mr. George Buck, the Vulcan merchant and the motor trip proved very instructive as it revealed to them both the fact that here in Vulcan and High River districts we have the advantage in every way. At Milo, Brooks, and other points they saw some very fair crops, but on the whole conditions were better here than at any point along the line and they are better satisfied than ever with their respective towns as a place to live in.

While at Hutton, they entered the municipal office to make enquiries about land and while there J. D. Johnston, a former High River farmer, dropped in and greeted them warmly, when he recognized them. Mr. Johnston owned land at Cessford which he sold recently.

At Bassano they met Mr. George Walker, former auctioneer of High River, who enquired anxiously after old friends here. He is engaged in farming near there, having homesteaded on some land years ago.

CUTTING CROP OF SUNFLOWERS

In company with Mr. H. McKenzie, The Times man went out to the Round T ranch on Tuesday, to witness the operation of the cutting of a 20-acre field of sunflowers. Mr. Cockshutt, of the Cockshutt Co., Calgary, and Messrs. Calvert and Collins, of Mount Forest, were here to supervise the cutting operation, but unfortunately cutting had to be delayed for a day owing to the pressure of work on men and teams in cutting several ripe fields of oats. A huge silo of 400 tons capacity was in course of construction and is now ready for the storage of cornflower silage. Next week we will give full particulars of this new phase of farming in Alberta, which Mr. Bennis, Superintendent of the Round T ranch, says is beyond the experimental stage, and without doubt solves the difficulty in this country of stock raising. He is very enthusiastic about sunflower as silage and intends to have erected several silos for the feeding of his stock during the winter months.

PASSING OF A PIONEER.

George Emerson is dead. By this death the province loses one of its earliest settlers and the West one who has played well his part in making this country great. To him it was permitted to enjoy a good old age, practically uninterrupted by illness, and his latter days were made bright by the review of a wonderful development which originated from the efforts of the pioneers, one of the chief of whom was George Emerson. He was 77 years of age at the time of his death.

Deceased was a resident at Danville, in Quebec, in the days of his youth, and when a young man went into the state of Iowa, remained for a time in the vicinity of Council Bluffs. He left there in 1868 or '69.

Coming by way of the Missouri River, he came north into Canada, trailing through the Cypress Hills country and on up to the Edmonton district, wintering at a place called Smoky River. He then returned to Edmonton and entered the employ of the Hudson's Bay Company, as freighter, covering the territory between Edmonton and old Fort Garry, now the city of Winnipeg, and between the several trading posts of that company throughout the West.

In 1877 he formed a partnership with Dominick Lynch in a cattle and drover business, operating between Montana and Alberta until 1883. In this year he located on premises above the present Bar U ranch, on what was long known as the Emerson ranch, and here established the Anchor P brand, and operated individually until 1910, when he formed a partnership with Rod. Macleay, which partnership existed until three or four years ago.

In 1906 he removed to the Little Bow, some distance south of Brooks, and four years later went into the Red Deer country, about 24 miles north of Brooks. He recently sold his interests to Rod. Macleay, and has since for the greater part of the time made his home at High River, but spending periods in California.

Coming to this country when he did, when there were few white men, and living through a period of wonderful changes and development, gave to him an experience which comes to few men. His mode of travel on his coming was by horseback and ox cart, and his remains will be conveyed to their last resting place by auto-hearse. His long years in this country, following an industry which has made Alberta and the West famous, gives him a place of prominence in the history of a country, which is foremost in a great dominion of a mighty empire.

This long life of usefulness and pioneer experiences was full of incidents of interest, and Mr. Emerson in one or another way, had to do with ranches which have since become famous, having the distinction, with Mr. Lynch, of filling the contract of driving the first Bar U cattle herds from Spokane and Lemhi Valley (Idaho) up to the present Bar U. Mr. Emerson erected the first cabin on what is now the Round T ranch, which he built in 1878 or '79. Success has been the reward of honest industry and deceased has accumulated wealth, and his holdings now include an interest with Mr. George Lane in the largest business block in High River, which is known as the Lane & Emerson block.

Recent events have given opportunity for the proper recognition to Mr. Emerson, merited by him as one of the earliest settlers and a factor in the progress of the country. In the historical pageant just lately staged by the Hudson's Bay Company in Calgary, Mr. Emerson was given a place of most prominence, and at the reunion and jubilee in connection with the High River exhibition on August 11th, he was chosen as chief of the old-timers, and on that occasion was presented with an address and gold-headed cane.

The good things have been said of this good man even before his death. Those who know him best esteem him most, and the whole community mourn the loss of an old-timer and a man.

There is no demand for hay at present and meanwhile grain has all the attention. Hay at Calgary is selling for \$25 a ton and timothy at \$30.

Mr. O. G. Walker has sold his farm, east of Calgary, to Mrs. H. C. McKay, of Nanton, who will take possession shortly. Mr. Walker will hold an auction sale in the near future of his stock and implements.

P. W. King, once sheriff of Calgary, died at the age of 87 years.

Nearly 15,000 acres of forest preserves surround the city of Chicago.

Good Business

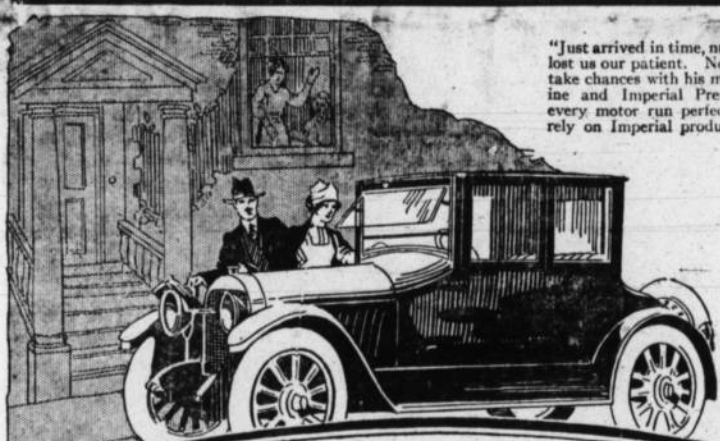

Do You Realize that there are occasions when the Size and Importance of your Business are judged by your Office Stationery? That is why you should get your Printing from The VULCAN ADVOCATE. We have an up-to-date plant,

AND

Our Printing is the Kind You Like to Use.

Our prices will compare favorably with our City Competitors.

The Vulcan Advocate

"Just arrived in time, nurse, delay might have lost us our patient. No doctor can afford to take chances with his motor. Imperial Polarine and Imperial Premier Gasoline makes every motor run perfectly. We can always rely on Imperial products."

You Can Depend On It

EVERY drop of Imperial Polarine is 100% lubrication. It spreads a protecting cushion of oil between all wearing parts, making each part function smoothly and reducing wear to a minimum.

It has exactly the right body—forms a perfect piston-to-cylinder seal, maintains compression, conserves power and saves fuel. It does not break down or run thin under extreme heat.

Imperial Polarine burns clean, reduces carbon deposits to a minimum and assures long life, smooth running and reliability to your motor at all times, under all conditions.

There is an Imperial Polarine grade for every motor need, from crank shaft to differential. Consult the Imperial Polarine Chart of Recommendations for the correct grade to use in your car—it is on display wherever Imperial Polarine is sold.

Sold in one and four gallon sealed cans, steel kegs, half-barrels and barrels, by dealers everywhere in Canada. Buy in large containers and save money.

ABOUT SYLVAN LAKE.

Mr. Hagerman, the Vulcan real estate broker, has also an office at Sylvan Lake, Alberta, at which point there has been considerable activity in the matter of the sale of farm lands. The country around there is particularly adapted for dairying and mixed farming, and those who have settled there appear to be very well satisfied with their lot. Mr. Hagerman is now at Vulcan while Mr. Colwell is at Sylvan Lake, managing the office at that point.

THE BUSINESS OUTLOOK.

The looked-for slump in business is a long time coming. While opinions differ as to the present outlook in the business part of the world there seems to be growing sentiment, in many circles, which is becoming stronger and stronger as the season advances, that the coming fall and winter trade will be fairly active, owing largely to the improved agricultural situation. Press reports are showing more and more the improved feeling which now seems fairly evident in consequence of the prospects of a good yield, particularly in the West, where in spite of dry spots which have occurred it is hoped that the returns on the whole will be large. If these hopes are realized and due caution is shown, the future will be promising. There is still, however, a space of time to be passed over, and no one can prophecy with confidence what the final outcome may be. Meanwhile as long as caution is exercised there should be no need of great anxiety as to the outlook.—Petrolia Paper.

INCREASE IN LINE ADVERTISING

During the past six months newspaper concerns have been subjected to enormous increases in newsprint, printing material and in wages and as a result we have been obliged to increase line advertising (legal, municipal and otherwise) to 15 cents per line first insertion and 12 cents per line for subsequent insertions without change of copy. Ample justification of this increase is found in the fact that to-day the price of newsprint is 14 cents per pound, while on March 1st, 1920 it was only 8 cents. The price per copy of this paper heretofore will be 10 cents.

FINDS SPEECH FITS PLATFORM

Governor Cox's speech fits the Democratic platform as perfectly as Senator Harding's fits the Republican platform. Cox, like his platform, is specific, direct, courageous and progressive. Harding, like his platform, was diffuse, confusing, timid and stagnant. Governor Cox meets the full expectations of the friends of the League of Nations. He "favors going in."

OUR FOOD SUPPLY DEPENDS ON BIRDS

Do we appreciate our birds? asks a writer in "Conservation."

The west is threatened with a grasshopper plague, while in the east the caterpillar is causing havoc among the trees.

Man, by his insatiable slaughter of the birds, has so reduced the balance of nature that the destructive insects are getting the upper hand. Dr. Tolmie, minister of Agriculture, in introducing his estimates in the House of Commons on May 24, stated that Canada's annual loss from parasites amounted to \$125,000,000, and that in preparation for the expected grasshopper plague alone, there has been purchased 100,000 pounds of arsenic, 2,000 tons of bran and 50,000 gallons of molasses from which to make poisoned bait.

To overcome, or at least to minimize, the caterpillar plague, various methods of attack are being adopted, chiefly that of spraying.

Recently a woodpecker was noticed at work upon a tree which was being defoliated by caterpillars. With the aid of binoculars, it was found that, in one visit to the tree, it secured twenty-four caterpillars. This bird, or another returned at about quarter-hour intervals, each time disposing of a number of caterpillars.

Birds are the natural enemies of insects and bugs and, without them, we could not successfully combat the pests which destroy our food supplies.

By protecting the birds, we protect ourselves, very truly concludes this writer.

In a recent issue we were attracted by a display heading in the Lethbridge Herald, which read "Spend Millions Making Good Port at Vancouver." In perusing the main article we found it only referred to the Federal Government going to make Vancouver the leading seaport in Canada.

SERIOUS FIRE LOSSES.

Over in the United States standing timber to the value of over \$25,000,000 is destroyed every year according to estimates made by the forest service of that country. This represents a serious loss in itself and in reality even greater when the fact is remembered that the United States is using up its resources of timber four times faster than it is grown, and as a natural consequence, is facing the early depletion of its forest and still greater dependence on outside supplies. Fire ravages in Canada are even greater, as, indeed, is only to be expected from the greater extent of its forests.

The forest service is endeavoring to impress upon the public the danger that results from dropping a lighted match, a pipe coal, or a lighted cigarette or cigar stub in or near a wood. Hunters, fishermen and wood workers of all kinds smoke in the forests and automobilists carelessly toss bits of fire from their cars and speed thoughtlessly onward, unmindful of the possible source of conflagration they have left behind them. A single glowing cigarette end may cost the government thousands of dollars for fire fighting, to say nothing of the value of the timber destroyed, the desolation of scenic beauty and the harm done to watersheds. In protecting the national forests of more than 150,000,000 acres, the department of agriculture has to fight thousands of forest fires every summer due to carelessness.

LET'S GO AND STOOK.

The Editor of the Stony Plain Sun in his last issue says that while discussing the crops of the district with a farmer he got the following reply:

"Well, I weren't affiggerin' on givin' no estimates, but I guess the cat'll make about 60 bushels and the ye will run about nine gallons to the acre!"

PROVINCIAL NEWS ITEMS

Chas. G. Beeching, of De Winton, is the first man to take a car through to Lake Louise by trail. He made the trip on a bet and won, but he says he will not repeat the ordeal again as roads were very bad.

The eventual price of wheat from Western Canada will be \$2.85 a bushel is the opinion of men who know, and the total yield in the three western provinces will be about 270,000,000 bushels.

The Foremost country is now declared to be a splendid field for the exploration of gas and oil, and the Calgary Gas Co. should get busy and get its supply from there in case of a shortage at Bow Island.

Within a few years, according to Thos. A. Edison, the machines will do about everything in the office, just as they do now in the shop. Office workers will have better jobs and comparatively better pay the more they use the automatic devices," he says.

Several newspapers in Ontario raised the rate of subscription to \$5 per year.

There are hundreds of forest fires raging in B.C., and on Vancouver Island, south of Campbell river, which is noted for its splendid timber. No fewer than 250 fires have been reported and much valuable lumber has been destroyed. It is said that on the Island the trail of the camper is to be observed in the many fires taking place there.

A transaction in Dover township illustrates the great value of the land of this country. A farmer of the township recently refused \$35,000 for his 100-acre farm, which is situated within ten miles of Chatham. Recently he rented it for a term of five years at \$2,500 per annum. It is a clear agricultural proposition, as the farm is not in the oil and gas area.

Premier Arthur Meighen seems to be a great fighter and has a great capacity for hard work. He goes right out on the hunt for his opponents, and tells them what he thinks about them, instead of shedding avuncular tears over their unwillingness to see eye to eye with him. Recently he appeared in St. Mary's, Ontario, and delivered a speech and that same week we saw where he spoke in New Brunswick.

A Montreal man connected with the Coristine Fur Co., has given out the statement that the cost to administer the luxury tax will be close to 62 per cent. This is really appalling and accounts for the unpopularity of the tax. People generally speaking, do not mind paying the tax, but what hurts them is to realize that only 38 per cent. of the money collected goes to the reduction of our national debt, the rest being used in big salaries.

PRODUCE EVERYTHING HERE

The Colorado beetle, known familiarly in the east as the potato bug, has been introduced into this section this year. John Wolford brought to this office a score or more which he picked from his potato patch and he reports that they are prevalent in many gardens. This has been a prolific year in Alberta in the matter of worms, moths, grasshoppers and with the potato bug added to the already large list, we can see an energetic season ahead of us for 1921. Let us pray that the frosts of winter will destroy the whole bunch and thus save us from such visitations as we have had this year.

Don't Saddle Yourself

with either poor harness or inferior stable supplies. It's far cheaper to buy the best from us and get real value for your money.

Cheap Harness May be Dear

at any price. This is very apt to be the case with harness bought by mail. The concern a hundred or more miles away cannot sell good harness any cheaper than any one else. So when they cut the price they cut the quality too. Buy here and see what you are getting before you pay for it.

THERE'S PLENTY OF GAS

Oil men from all parts of the world are at present sitting in solemn conclave in London. The climb in the price of gasoline to over fifty cents a gallon has given most motor-car owners the impression that the supply of this valuable commodity is rapidly giving out, owing to the enormous quantity that is consumed every day. But it is not scarcity that is shooting up the price; it is the greed of the shareholders of the big oil companies who desire at least 240 per cent. profit. An oil expert now in London estimates that the western hemisphere still has known resources of 21,800,000,000 barrels. Of this prodigious supply the United States alone has 6,500,000,000 barrels. So it seems that the owners of motor cars need not get nervous over the idea that it will soon be necessary for them to revert to the use of the horse and buggy.

OH, YOU FOUR HUNDRED.

A party of twenty-three domestic servants from the British Isles landed in Montreal for service in Canada. Their passage money was sent them by prospective employers and they desired to carry out their contract, but ladies in the latest creations of Paris and New York besieged the girls and when a satisfactory wage was offered they accepted and left in luxurious limousines and stately touring cars. The original employers are now out both girls and passage money.

IN FREE TRADE ENGLAND.

The question of whether the embargo on the import of Canadian cattle into Great Britain will be lifted was settled by J. S. Macdonald, editor of the Farmer and Stock Breeder (London), speaking in behalf of delegates to the imperial press conference at Edmonton on September 1st.

"I am sorry to say we cannot allow the entry of Canadian stocker cattle into Great Britain," said Mr. Macdonald. "We have reached the stage where we can raise enough cattle to supply our own needs, and the British law provides at present that Canadian cattle for fattening cannot be imported. It is not that we do not want Canadian cattle, but that we prefer them fat and ready for slaughter. "We want you to realize that we have our own point of view in this matter. Seventy-five per cent. of the capital invested in agriculture in Great Britain is invested in the cattle industry, and the industry is naturally the dominating factor in British agriculture. There is no likelihood that the embargo on Canadian cattle for feeding will be lifted shortly."

THE LURE 'O THE NORTH.

Tim's Rhyme.

Many a wild and hardy rover,
Hit the trail—then all was over.

Three men with packs, life almost ended,
Dumped their packs on the log house floor;
Stamped their feet and hit for the door.

Of Tim's old shanty,
Grub was scant, and tea was thin,
But it warmed their bellies and warmed their skins;
So they never gave thought that a week ago
The man who fed them—don't you know?
Dined on dough gods and chunks of snow,
In his old log shanty—a week ago.

—In the morning, off they started,
In a week their souls departed,
And so did old Tim mid his shack and its grime;
Leaving behind him the following rhyme:
Nobody cares, neither do I,
If somebody calls in the near bye-bye,
When snow lies deep, and ice lies thick,
And the shanty's cold—no clock tick.
It's all in a lifetime, "darn my soul."
Some poor devil must pay the toll
Of snow bound trails, and nights a-black,
Of a fireless stove in an ice clad shack.
Where—genial devils await within,
And grunt, and howl, and laugh and grin
At empty bellies and blood grown thin,
At the toll of the trail when night is black,
At misery housed in the old log shack,
—At the nameless wail from the snowbound track
Who fell for the Lure 'o Gold.

J. P. C. 1896-

Lynchings occurred last year in sixteen of the states of the U.S. Of the eighty-four, there were seventy-eight colored people so murdered, and six who were white.

MAJOR BISHOP'S HEROISM.

Captain William Avery Bishop (D.S.O., M.C.), Canadian Cavalry and Royal Flying Corps (Form. 7th C.M.R.). For most conspicuous bravery, determination and skill. Capt. Bishop, who had been sent out to work independently, flew first of all to an enemy aerodrome. Finding no machines about, he flew on to another aerodrome, about three miles south-east, which was at least twelve miles the other side of the line. Seven machines, some with their engines running, were on the ground. He attacked these from about fifty feet, and a mechanic, who was starting one of the machines, was seen to fall. One of the machines got off the ground, but at a height of sixty feet Captain Bishop fired fifteen rounds into it at very close range, and it crashed to the ground. A second machine got off the ground, into which he fired thirty rounds at 150 yards range, and it fell into a tree. Two more machines then rose from the aerodrome. One of these he engaged at a height of 1,000 feet, emptying the rest of his drum of ammunition. This machine crashed 300 yards from the aerodrome, after which Captain Bishop emptied a whole drum into the fourth hostile machine and then flew back to his station. Four hostile scouts were about 1,000 feet above him for about a mile on his return journey, but they would not attack. His machine was very badly shot about by machine gun fire from the ground.

PROVINCIAL NEWS ITEMS.

Reports from different parts of the province of Alberta would indicate a small crop of potatoes.

A new bridge will be erected over Bow River at Banff, at a cost of \$243,786. The bridge will be 420 feet long, with a 36-foot roadway in four spans.

At the second day of the trapshooting tournament at the exhibition, held in Toronto, there was very good scoring, when Edward Dorken, of New Jersey; J. D. Clay, Horiston, Texas, and F. M. Troch, Vancouver, Wash., each broke 98 birds out of a possible hundred. In the shoot-off the last named won when he broke 99.

A colored speaker in New York recently made the startling statement that the negroes of Africa were about to order all the whites out of Africa. If they did not obey voluntarily the blacks would swoop down on them and engulf them. This is rather a pleasant prospect for the white population of Africa and meanwhile we have decided to keep clear of that delightful country.

The idea of impounding the automobiles of persons convicted of driving while in an intoxicated condition is not new. Other provinces and states do it and it would be a good idea for Alberta to try it. Neither fines nor jail sentences seem to have any effect.

NOTABLES AT BAR-U RANCH

Sir Roderick and Lady Jones, who have been travelling with the Imperial press party, are now spending a short holiday at the Bar-U ranch, the guest of George Lane. Sir Roderick is greatly interested in cattle as he has some interest in a ranch close to Calgary.

The figures for the month of July show that a total of 16,498 emigrants entered Canada.

Reports come from Ireland of the discovery of gold in County Westmeath. It may be some of the gold gathered by De Valera in the United States, during the past six months.

BETTER TO HOLD CATTLE.

In a letter received last Saturday from the firm of Clay, Robinson & Company, Chicago, written last Monday, there is the following interesting reference to the market: "We don't believe that holding the cattle is going to be to owners disadvantage as the fatter and harder they get them the better they are going to sell. There was a fair run here to-day and buyers were anxious for good cattle. We sold one load of 1353 lbs. Dakotas at \$15.00, with quite a string of others at \$12.00 @ \$14.25, averaging 1200 to 1300 lbs. The market is in good healthy shape and the prospects look favorable, more particularly for steers of good flesh and quality."

Beds, Springs, & Mattresses

We carry the famous **SIMMINS BEDDING**. A large assortment to choose from at prices on which we can save you money.

Headquarters for Harvesters Supplies of all Kinds.

Excellent accommodation can be secured at reasonable rates with respectable families in the town.

For Calendars and further information apply to:

A. E. MEYER, Superintendent of Schools of Agriculture, Edmonton, Alta., or

J. C. HOOPER, Principal, School of Agriculture, Claresholm, Alta.

Chevrolet "Baby Grand" Touring Car.

By scientifically safeguarding the quality of every piece of metal that is used in the construction of the Chevrolet valve-in-head motor, uniform efficiency and low operating costs are assured.

And as the capabilities of the motor are proven before it leaves the factory, the purchaser of a Chevrolet has the certainty of future satisfaction.

Such assurance means much. It means an investment in economical transportation that is safe, certain and adequate for all uses and emergencies. To buy a Chevrolet is to buy a known quantity—a proven quality.

CHURCH NEWS.

Rev. A. E. Hayes occupied the pulpit of the Union Church both morning and evening. In the morning his theme was "Life Service." In making such a great decision, the minister said, one likes to feel that one is on the winning side and not championing a cause that is hopeless. Years ago in Jerusalem, two leaders were before the people; one Barabbas and the other Jesus. When the people were asked which they would have, they cried aloud for Barabbas. The mob in their frenzy seized upon one who could only lead them into darkness. The disciples cast in their lot with Jesus and went forth on a life's service that has meant so much to humanity. The minister then briefly traced the course of events that started at the Crucifixion. Issue after issue came up and people had to decide on which side they would serve. Take for instance the issue of slavery. The issue was a moral one. Jesus in his doctrine on the brotherhood of man taught that human life is sacred, and must not be trafficked in. The south took the other side and lost,

not only by force of arms, but force of argument. The minister went on to show that reason was all on the side of Jesus. The present issue, that of the traffic in intoxicating liquors is a moral one, and here again the teaching of Jesus plays such a great part. For a time there may appear to be a temporary victory on the part of the liquor interests, but when the people wake up and become less muddy-minded, they will wipe the traffic from the face of the nation and once more declare a victory for the cause of Christianity. We need men and women who will give life service to the cause of Christianity and become expert Christians. It is because we are half asleep that the wrongs around us flourish.

VULCAN NEWS ITEMS

Mr. Stewart, manager of the Bank of Commerce, is spending his vacation at Prince Albert.

Messrs. F. Simington, Bob Simington, F. M. Anderson and Kettleston left Vulcan on Sunday on a duck shooting expedition.

dition. They spent the night in a barn with the cows and the chickens, and had perforce under these conditions, to be up bright and early to spend the day with the ducks. They report ducks plentiful, but according to their story of bringing numberless ducks down, but which flew away again, they must have been using pea-shooters as well as their guns, and firing at the same ducks all day. However they returned home Monday evening very tired and sleepy with a bag of about forty-five.

The funeral of Henry Adams, who was accidentally killed on Monday, August 30th, took place on Thursday, September 2 in the Vulcan cemetery, and was attended by a large number of friends, which showed the high esteem in which the deceased gentleman was held. The Rev. A. E. Hayes conducted the services. The deceased was 45 years of age and leaves an aged mother to mourn his loss.

SMALL FIRE AT LOCAL GARAGE.

What might have been a very serious fire broke out at the Chevrolet Service Station this morning when some compound used in battery work caught fire and caused a blaze. The employees immediately got busy with fire extinguishers and had the fire out before the brigade arrived, which was only a few minutes after the ringing of the bell. The action of the many citizens who rushed to the station and the scene of the fire to render assistance was very commendable.

At the Lacombe station it has been found that no fall plowing should be done at a depth of less than six inches. Fairly deep plowing gave results far beyond the extra cost of turning the additional depth.

Experiments have shown that the best results from fall rye in every way have been obtained from sowing not later than the early part of September, and to get good fall pasture, August is the best month.

THANKSGIVING DATE

Last year Thanksgiving was observed in Canada on Monday, October 13. As it has become the practice to have Thanksgiving fall upon a Monday, in order that a long week-end may be provided for the people who desire to spend the holiday with their families, it is almost certain that the change of date will be between Monday, October 11 and Monday, October 18. Last year some one suggested that the first Monday in November be selected as a permanent fixture in order that it might be celebrated in connection with Armistice Day, but nothing has been heard of it.

WAR TROPHIES.

H. M. Shaw, M.P., for Macleod, has been advised that the war trophies for that constituency have been awarded as follows:

Macleod—Two guns.
High River—One gun.
Clareholm—One trench mortar and one gun.
Nanton—One trench mortar.
Staveland—One trench mortar.
Blaymore—Two machine guns.
Coleman—One machine gun.
Cowley—One machine gun.
Granum—One machine gun.
Okotoks—One machine gun.
Pincher Creek—One machine gun.

BIRTHDAY CONGRATULATIONS

The Hon. George Foster, minister of trade and commerce, observed his 33rd birthday on September 3. With the exception of the late Sir Wilfrid Laurier, he has seen the longest parliamentary service under confederation of any public man. He has served 34 years and one month and 19 days, and Sir John A. McDonald 23 years, 8 months and 12 days. He is entitled to the best wishes of all Canadians.

THE COMING PLEBISCITE.

Your attention is called to the fact that according to the Dominion Election Act of 1920 the whole basis of the franchise in Canada has been changed and the forthcoming vote on prohibition is to be the first under the new order.

In villages of less than 1,000 inhabitants and in country districts enumerators will go from house to house and will register the voters entitled to vote at this plebiscite and at future Dominion elections. This plebiscite is to be taken in the electoral riding for the province rather than on that of the Dominion, and Rev. Wm. McNichol, of High River, is the organizer for this riding.

In towns and cities of one thousand population and over, the new lists are to be prepared by registration. Registration dates are September 13th to 18th, inclusive, from 9 a.m. to 9 p.m., except between 1 and 2 p.m. and 6 and 7 p.m. The place must be announced by September 8th.

In cities of four thousand population and over, a registrar will be appointed for every four thousand or portion thereof. Places of registration to be conveniently located.

Everyone must appear in person before the registrar and answer under oath the questions provided in the act. Previous registration on any earlier list, municipal, provincial or federal, is of no value.

Failure to register at this time, whether through neglect, ignorance or mistaken ideas about the matter means no vote, disappointment for the citizen and the cause.

For those who may not be able to appear and register through sickness, disability, or necessary, temporary, unavoidable and bona fide absence from the place where he or she seeks to vote, special provision is made whereby application may be made on his or her behalf by a relative or employer, who has personal knowledge of the facts and can make affidavit thereto.

THOSE ENTITLED TO VOTE

Every British subject of 21 years and over, male and female, resident for one year in Canada, and 2 months in the polling subdivision prior to the date of the posting of proclamation. Wives of naturalized British subjects, born outside of British and American territory must appear before a judge and receive a permit from him and have their names placed upon the voters' list before they can legally vote. All others, wives of natural British subjects, can have their names placed on the voters' list without appearing before a judge.

THE SALESMAN EPIDEMIC.

(Strathmore Standard). The effective means employed by farmers in areas which the grasshopper used this spring as a jumping off point reduced the damage done by these pernicious insects to a minimum.

Another plague of a somewhat different variety is now upon us. This is the itinerant salesman epidemic. The farmer, however, is not the only sufferer. It affects the townsman as well.

While the grasshopper has a partiality for young grain, the other kind of pest has a partiality for bank-rolls. Unless the victim is a very strong minded type of individual, he will be driven into a corner and talked into a state of coma, when the aggressor will work his will on him to whatever extent he has ascertained he is good for.

While Paris Green and bran is all right for grasshoppers, it cannot be used against the insurance men, etc. The law will not stand for it.

No effective means of protection has yet been devised against this class. They may attack in the form of a book agent, lightning rod man, insurance, or multifarious other forms. Some people have tried to corner them by offering them jobs or work, but this has never proved effective.

A close examination indicates that these suave and well-dressed individuals make more money by a long way than the worker, even with harvest wages six dollars a day and up. They can sell the people whom the local dealers cannot sell to at all, and charge twice the money that the local man would ask and get away with it. It seems a pity that in this day and generation, when productive labor is so scarce, the energy of many of these people could be diverted to some useful purpose. Besides the loss of their own productive time, they always consume a considerable portion of the time of their victim.

There is room for the legitimate salesman, but the house-to-house canvasser could very well be dispensed with, except when sales of major articles are involved, or in cases where he increases home production. The home dealer doesn't usually make a success of that sort of business anyway. He hasn't gall enough.

NEW FIRM OPENS OFFICES CALGARY STOCKYARDS.

(Market Examiner.)

The Frank Hill Cattle company's offices have been opened at the Calgary stockyards and the new firm has not lost a minute about getting into business, for already they have secured a great many stocker and feeder cattle at the yards, this being one of the lines in which they will be particularly engaged, as well as dealers in cattle generally.

The company has been incorporated, with Frank Hill as president and manager, with O. F. Bremer and J. L. Butler on the directorate, on which there are other prominent stockmen who will not be actively engaged in the affairs of the company. As was mentioned a short time ago the firm has been fortunate enough to secure the services of Chas. Biggs as secretary-treasurer, who will have charge of their office management.

All the members of the firm are well known as stockmen and have been operating independently on the yards for a considerable time. The combination of forces makes the firm a very strong one. With the facilities which the company has for carrying a large number of cattle they will be particularly well situated to cater to the stocker trade and prospective buyers are invited to ask their advice as to conditions and obtain the benefit of their experience and information.
